EUSTON 4477.

183, EUSTON ROAD,  
LONDON, N.W.1.

21st December 1953.

Dear Professor Lederberg,

S. D. Rubbo, who is at present enjoying the hospitality of your laboratories, asked me to send you 5-aminoacridine and its tetra-hydro derivative for investigating agglutination of H-phases of Salmonella.

I enclose these substances and hope that they prove helpful.

With kind regards,

Yours sincerely,

*Adrien Albert*

Professor J. Lederberg,  
Department of Bacteriology,  
University of Wisconsin,  
Madison,  
Wisconsin,  
U.S.A.
